45th Annual
HUBERT
CHAROLAIS
RANCH
Bull Sale

Dear Cattlemen,
Welcome to our 45th Annual Production Sale
and our 65th year in the Charolais business.

We are offering 78 breeding age bulls and 25
high quality females in this year's offering.

For the first time in many years, we can
honestly say our area has been blessed with an abundance of winter moisture.
We are hopeful you have experienced the same.

As you read through our catalog, we have provided for you every tool and piece of
data we can to allow you to make as educated a selection as possible. Current
weights and scrotal measurements will be available to you by the sale date.

Videos will, again, be available 2-3 weeks before the sale. If you cannot attend,
please contact myself, Cole, Colt Keffer, or bid online with DV Auction.

Every bull in this sale has been 100k and PA tested. With the 100k test you
have the most advanced and updated data available. Every animal four years or
younger has been PA tested. This information will be available to you on sale day.
All animals sell as guaranteed breeders.

We welcome you to our 45th Annual Sale. Please let us know how we can assist
you.

Sincerely,

David & Shelby Hubert
Craig & Cheri Renner
Cole & Bailey Renner

Semen Test Information:

All bulls will be semen tested and scrotal measured prior to sale day by Dr. Paul Ritter, Monument, Kansas. Please feel free to contact Dr. Ritter at 785-672-2500, if you have questions. Those tests results will be printed and available at the sale.

Health:

Certified Brucellosis-Free Herd #1013

Motel Accommodations:

Sleep Inn & Suites
Oakley, Kansas
785/671-1111

Lunch:

Lunch will be served at the sale site, starting at 11:30 a.m.

First-year Breeding Guarantee

FREE DELIVERY OR \$\$\$ OFF

Free delivery within 150 miles to central locations on major highways or pro-rated cost outside of 150 miles up to a \$400 per head maximum throughout the United States.

OR

Sale day only — Bring your trailer and we'll deduct \$100 per bull if you live outside of a 150-mile radius or \$50 per bull if you live within a 150-mile radius.

Semen Rights

HCR will retain the option to obtain semen from any bull sold at cost of collection and no further signing fees. Collection will be at the convenience of the buyer.

EPDs: EPDs current as of Feb. 26, 2024.

Charolais Average Breed EPDs: CE:

11.2, BWT: -1.2, WWT: 61.7,
YWT: 111.2, Milk: 24.1, MCE: 9.4, MTNL:
55.1, SCRO: 1.0, CW: 23.9, REA: 0.70, Fat:
0.014, Marb: 0.13, TSI: 254.61

CE: Calving Ease (A higher value indicates greater calving ease)

BW: Birth Weight (A lower value indicates the difference in average birth weight)

WWT: Weaning Weight (The expected difference in average weaning weight of calves)

YWT: Yearling Weight (The expected difference in average yearling weight of progeny)

Milk: Maternal Milk (The genetic ability to express pounds of weight through dam's milk)

MCE: Calving Ease Maternal (A higher value indicates greater calving ease with a sire's daughters)

MTNL: Total Maternal (A value to predict weaning weight due to genetics for growth & maternal ability)

SCRO: Scrotal Circumference (The expected difference of bull's in circumference at yearling)

CW: Carcass Weight (Expressed in pounds and is a predictor of hot carcass weight at age constant endpoint)

REA: Ribeye Area (Expressed in square inches and results in larger ribeye's and lower yield grades)

FAT: Fat Thickness (Expressed in inches, decreased fat should result in lower yield grades)

MARB: Marbling Score (A primary component of USDA Quality grade, selection for increased Marbling Score should result in cattle with higher quality grades at the same age endpoints)

TSI: Terminal Sire Index (Is a formal method of combing many EPD traits into one single value. The TSI represents a dollar index per terminal progeny produced, ranking them for profit potential. Example: If Sire A's index is \$191.00 and Sire B's index is \$200.00, then we would expect Sire B's offspring to average \$9.00 more net return than Sire A's offspring)

This sale will be broadcast live on the internet.

We start off the bull offering with a stud that has an abundance of body, mass and thickness in a very eye appealing package. Parthenon is in the top 1% of the entire breed for weaning weight, yearling weight, scrotal circumference, TSI and Carcass weight. His carcass traits are further enhanced with a marbling EPD in the top 4% and REA in the top 9%. Add in that he is the number one ranked bull in his contemporary group for yearling weight. If that isn't enough, he has a 4.06 IMF to put him well ahead of his class. His granddam (pictured) has placed sires in the purebred herds of Sandhills Charolais, OK, Broberg Charolais, NE and Cody Cattle Co., KS. Parthenon is tested Homozygous Polled and PA Free

Kansas is deep and thick. If you trust the science then study his numbers and EPD rank with the Charolais breed: Weaning Weight 2%, Yearling Weight 5%, Milk 6%, maternal 1%, TSI 9%, REA 2%. He is the number one ranked bull for yearling weight in his contemporary group. His adjusted REA is 18.93. Kansas is big and stout in every facet. His dam weaned off four bull calves with an average weaning index of 103.3. He is tested Homozygous Polled and PA Free.

A bigger framed bull with the same performance traits as the bulls already mentioned to start off this catalog. Growth genetics galore: Weaning and Yearling Indexes of 116 and 112. Weaning weight and Yearling weight EPD's to rank him in the top 2% of the breed. He is also high ranking in TSI, Carcass weight and marbling. If you want to add pay weight to your calf crop this guy should be highly considered

It sounds like a broken record but feast your eyes on these performance numbers: Weaning weight, Yearling weight and TSI all in the Top 1%. Then consider these carcass traits: Carcass weight, REA and Marbling all in the top 4%. 3177 is a ¾ brother to Lot 3,7,8 and 9. Put these ¾ brothers to work together.

Blockbuster is just as his name would suggest – solid, thick, deep and wide bodied. He possesses a low birth weight and herd building numbers with an 800+ weaning weight and bumping right up next to 1400 lbs. at a year. His IMF measurement ranks him #1 among his peers. His dam is a beautiful Silver Distance daughter. She has weaned four calves with an average weaning weight ratio of 105.8. Local ranchers Kaleb Holaday and Reilly Ritter have brothers to Blockbuster working in their herds.

A really nice Centurion out of another longtime producer at HCR. His dam has produced 9 calves in 11 years. She has placed sons in the herds of McDanel's 3 MC Charolais in Iowa and Barry McPeak and Brian Gerstberger in Kansas.

If you are looking for a performance pedigree but still concerned about calving ease study this: His dam's nine calves have an average birth weight of 78.4# and this bull has a -1.5 birth EPD.

Miss HCR Ledger 324 Pld - Dam of Lot 11

HCR Centurion 0210 - Full Brother to Lot 12

REFERENCE SIRE

Riptide is one of those unique sires that is a calving ease specialist and still has solid performance numbers. He is siring early gestation calves with low birth weights. Riptide is homozygous polled and PA free. His birth weight EPD is -3.2 and his CE EPD is 18.6 ranking him in the top 4% of the breed. Riptide is owned by long time cattle breeders Schmidt Cattle Co., NE and Doll Charolais, New Salem, ND.

Here is a calving ease specialist with good performance figures. -5.0 BW and +19.6 CE EPD's rank top 2% and 5%. His grandsire has been used at Lindskov Ranches for many years as a calving ease specialist. His great-granddam LT Brenda 8034 is one of the best cows I have ever laid eyes on. Use the Riptide sons for calving ease and quality.

Pacesetter excites us as much as any bull we have produced in recent years. He is big, long, deep sided and has eye appeal. If you look at his EPD profile – he is Green across the board. In every trait that is measurable, he is positive and in a big way. Let's analyze further: He has Top 5% breed numbers in weaning weight, yearling weight, milk, maternal, maternal calving ease, scrotal, terminal sire index and rib eye area. His spread from birth to weaning goes from -2.3 to 143. He is the number 1 weaning and number 3 yearling weight bull in his contemporary group. His actual IMF ratio is 113. What else can we say? Oh yes – he has been tested Homozygous Polled and PA free.

Miss HCR Ruthann 7050 P - Maternal Granddam of Lot 16

Age advanced bulls sired by Riptide and out of a tremendous donor cow Lila 6073 who we lost last summer. These bulls are all negative birth EPD bulls. Lila was a very soggy easy doing female. Wes Chism saw her on a herd visit and thought she was the best cow in our herd. All four full brothers have respectable birth weights and very solid EPD's. 207 and 215 tested homozygous polled which would indicate the other two are as well. Use this set of full brothers to enhance your herd.

You will like this guy. He is thick and good. His dam is a 12-year-old cow that doesn't owe us anything. She has weaned nine calves with the following indexes: 114, 101, 102, 106, 102, 104, 101, 93, 98. She might be slowing down but the consistent genetics are still built into this bull. He developed nicely after weaning, posting a 3.61 ADG.

We start off the Triumph sired bulls with a nice low birth weight that went on to perform at a 107 weaning weight index and a 115 yearling weight index. Titus has breed percentage figures of Weaning Weight 7%, Yearling Weight 1%, TSI 2%, CW 7% and REA 8%. This bull's dam produced a son of Centurion that was purchased by Ron Siruta, Oakley, KS in last years sale. This bull excelled on test gaining 4.2# per day.

The bull Cole and I thought best represented the Triumph sire group. His dam is a beautiful Pyramid daughter that goes back to a super good female we purchased from John Allison and David Carter in Kentucky. Her average weaning weight on three calves is 104. Her average yearling weight on her two sons is 108. This bull has a really nice spread from -0.1 birth to +144 yearling weight EPD. His TSI score is excellent rolling in at 280.61. Add in that his individual weaning and yearling weight indexes are way above average, and you have a bull that deserves the name Swagger. Tested homozygous polled.

Thick, correct, good boned, wide topped – just a few of the adjectives to describe this bull. He really packs the punch starting at a low birth weight of 75 lbs. He has a nice spread from birth: -2.0 to weaning EPD: +80. His young dam has weaned two calves for a weaning weight average index of 105.5. Consider using this bull if you want calving ease and want to market your calves at weaning time.

A high-performance bull weaning off at 746# for a 107 ratio among his contemporaries. His dam is a larger framed cow that has produced six calves for an average weaning weight ratio of 105.8. Definite performance here with this long-bodied bull.

Let Waymaker show you the way! Cole and I think this bull would definitely fit the bill for a high-quality heifer bull. His minus 2.3 birth weight along with a 793# weaning weight and a plus 74 weaning weight indicate calving ease and excellent performance. His dam is as good as they get and the entire cow family ranks high with us. He will do nothing but continue to get better. We tested him and he is homozygous polled.

Stout, well-made son of Patriot 0065. His dam is a ranch favorite. She has a nursing ratio of 107.7 on three calves. His full brother was selected last year by Jeff Gerstberger, Gainesville, TX and he knows the good ones. Paladin should also make an excellent calving ease sire with his minus 3.4 birth weight EPD.

This high-performance bull has a dam who has produced nine calves in her eleven years here at the ranch never weaning a calf under a 100 index. There is power and performance galore in his pedigree. He pounded the scale to a 114 index at both weaning and yearling. His weaning and yearling EPD's rank in the top 15% of the breed. He also gained 3.75# on test. Now I know you are all going to look at his 106# birthweight but if the science is sound and with nine calves factoring into the database of the AICA his birth EPD is only a plus 0.8. I recommend breeding this bull to large framed cows and taking advantage of all this performance.

An own son of LT Patriot 4004 and he won't disappoint. Full Throttle has an across-the-board EPD profile that will knock your socks off. He ranks in the top 10% in the following relevant traits: Weaning weight, Yearling weight, Milk, Maternal, TSI, Carcass weight and Marbling. His dam has weaned six natural calves with a nursing ratio of 103.0. With Doc Silver you get the added benefit of calving ease and marbling. The average birth weight on her six calves is 80.2 and his marbling EPD ranks in the top 8% of the breed.

If you are old enough to remember the movie and the character "Shaft", he was one cool dude and so is this bull. You will find him in the pen and I'm certain you will like what you see. He flaunts a minus 3.8 birth EPD so you can use him with confidence. His young dam has weaned three calves to indexes of 102, 109 and 101.

Another high-quality son of Justified. He starts with a minus 1.1 birth EPD and goes on to rank in the top 25% for weaning weight and yearling weight EPD. His dam has placed sons in the herds of longtime customers Maddux Ranch, OK and Shawn Jacobs, KS.

We reference measurable traits a lot in this industry. The industry has moved forward with the use of these numbers. This bull has a slew of things that work very favorably for him. Let's start with his minus 3.4 birth EPD which ranks him in the top 15% of the breed. He follows that up with Yearling Weight and TSI at 4%. His numbers also indicate he should be a good maternal sire and has potential to sire daughters that will make a nice set of profitable cows - Milk and Maternal EPD's that rank in the top 1% of the breed.

This is a bull built with nice conformation and muscling. His weaning weight, yearling weight and TSI EPD's all rank in the Top 15% or better within the Charolais breed. His individual indexes for weaning and yearling are 107 and 106. His dam has placed herd bull progeny in several herds; Ringler Ranch, KS, Angora 6-S, OK, Bates Cattle Co., OK, Reigns Ranch, MN.

The highest weaning ranked Pyramid with a 111 weaning weight ratio. He has a nice low birth weight of 76# and birth weight EPD of minus 3.2. He moves onto Yearling weight and TSI EPD's that rank in the top 25%. His dam has weaned five calves for an average weaning weight ratio of 104.6. His dam has placed a nice female in the Parker Cattle Co. herd in Idaho. A purebred herd sire is working in the Hebbert Charolais herd in Nebraska. Ron Siruta purchased a high performing brother to 3237 a couple years back. We talked about his weaning performance, but he also went on to index 107 at yearling.

Guests loaded on trailer to tour cows and calves

Houlio son out of one of the best cows to grace our pastures. His maternal brother was a favorite last year going to outstanding commercial cattle producer Jr. Augustine for \$13,500. Another maternal brother is HCR Marvel currently being used in our herd. This bull got off to a slow start due to the weather. Don't hold that against him - he will produce pounds.

Hit the Jackpot with HCR Jackpot. He has an interesting combination of performance and maternal genetics. He is plus 143 for yearling weight EPD (4%) and 279.71 terminal sire index (8%) yet is in the top 2% for milk and 1% for maternal in the breed. Jackpot is a full brother to HCR Boost who sold in last year's sale for \$12,500 to Lyle Peterson, Isanti, MN. Add in the fact that he gained 4.08 on a test designed to grow the bulls at 3.00 lbs. per day and you have a feeder calf producing giant.

Canadian outcross genetics that worked well in our herd. These progeny are the last we are able to offer as we have used up our allotment of semen. There are only four bulls in this offering but they are rock solid. High yearling and TSI numbers indicate he will produce efficient feeder cattle. Houlio is homozygous polled and has a quiet temperament.

It sounds like a broken record but again use these Eastmans for carcass and specifically for marbling. He also is in the top 15 percentile for marbling. He was knocking on the door of a 700# weaning weight indexing 103 and 104 for yearling.

As you would expect with an Affinity daughter, she has a very nice udder placement and plenty of milk. Sprinkle Doc Silver into the pedigree and it helps the birth weight EPD rank in the top 1%, Milk at a +36 to rank in the top 4% and Marbling making its way to a top 20% ranking. Her heifer calf is young, but she is nice patterned, correct on her feet and legs and sharp fronted.

LOT 86A - Polled heifer calf #3515, born 10-21-23, BW: 66 lbs., sired by HCR Marvel 1177 PLD.

A Fresh Air daughter with depth of body and easy doing characteristics. She has placed bulls in the Stanley Anderson herd at Lincoln, KS and Jim Glassman, Oakley, KS. She leaves us with a very nice daughter of Pyramid. Her heifer calf sired by Patriot 0065 has a nice pattern and has every reason to be a very productive cow.

LOT 88A - Polled heifer calf #3516, born 10-24-23, BW: 71 lbs., sired by LT Patriot 0065 PLD.

As you can see from the picture this heifer has a nice pattern and is square and thick. She is a daughter of HCR Marvel 1177 PLD our home raised herd sire. Marvel is sired by the well-known Wienk bull, Icon. The bottom side of her pedigree features Doc Silver and Rancher. She weaned at an excellent 106 index.

This heifer is powerful and hopefully finds someone who is willing to put a halter on her. Patriot on the top side and female producer Eastman on the bottom takes the guess work out. Her negative 4.3 BW EPD to plus 148 Yearling Weight EPD is a huge spread.

This heifer is a card-carrying member of as good of an EPD profile as you can build. Look where she ranks within the breed for the following EPD's: Calving Ease 4%, Birthweight 9%, Weaning weight 6%, Yearling weight 2%, Maternal 5%, TSI 2%, Carcass weight 2%. She's also backed by a good dam weaning her first three calves at 103, 107 and 100 indexes.
